

Basements Are Available at Windstone!

**As with most of our advanced construction techniques, our
basements are different...**

Our basements feature:

9' poured foundation walls.

A moisture membrane on the exterior wall.

Drainage systems on the interior and exterior.

Sump pump.

**2" solid closed cell foam on the walls providing a conditioned
interior space.**

**The A/C system is sized for the additional basement space
and built with vents and returns. All that is required to
finish the space are studs, sheetrock and electrical.**
